

## Student Feedback, Analysis and Action Taken Reports during the year 2019-20

On the basis of feedback, taken from the students and reviewed at Department level, a report is hereby submitted to the worthy Campus Director for giving his comments on the submitted report.

| Feedback   | Analysis of feedback  | Action taken on feedback   | University response |
|--|---|--|---------------------|
| <p>The feedback of students of CSE were found highly satisfactory. However, they showed their interest while covering syllabus, with equal or uniform passion. The basic content should be taught in the first phase &amp; followed with the advances in content of Syllabus. It will help the student to grasp the knowledge up to their satisfaction.</p>  | <p>The feedback was assessed by Head of the Institute and showed the concern that CSE Department should follow the Instructions while teaching Computer Organization and Architecture, so that the students are benefitted.</p> | <p>The Director the Institution gave due weightage to the feedback and showed compliance with the student. He passed on the Instruction to all the concerned that all the teacher should follow the guidelines of PTU, while covering the syllabus during teaching hours. The covering of syllabus uniformly may also be conveyed to me.</p> | <p>NA</p>           |
| <p>The student of Civil Engineering Dept. raised one point about the disaster preparedness and planning. This is very practical subject which deal with the natural calamities and student must come across with the technologies which can help enormously and act voluntarily if disaster management situation prevails. They showed keen interest in subject and also want more knowledge beyond syllabus</p> | <p>The feedback was analyzed and was rather appreciated that student was having ethical value in their mind, while dealing with the national issues, which arise by nature.</p>   | <p>The director desired that a common guest lecture of a person of national repute should be invited to pass on the new knowledge developed with regard to natural calamities like flood and drought, fire, tsunami etc.</p>   | <p>NA</p>           |

| Feedback   | Analysis of feedback   | Action taken on feedback   | University response |
|--|--|--|---------------------|
| <p>The student of Mechanical Engineering was found more or less highly satisfied but they showed difficulty in grasping the knowledge in the subject "Statistical &amp; Numerical Engineering &amp; QI-I. Similarly, the students should be provided with the infrastructure as well as the skill while making minor projects.</p> | <p>The Analysis clearly showed that the student have in their mind some doubt about the subject, while covering the numerical portion. Likewise, the student showed their reservation in fluid mechanics lab, where they said that learning value in terms of knowledge, concept and analytical ability is at slow pace, requires immediate attention.</p> | <p>The director of the Institution, considered the feedback very critical and requested the HOD that some extra classes must be arranged to solve the Numerical Problems. Similarly, the lecture should be made more realistic and knowledge oriented so that learning level of the student may be improved.</p> | <p>NA</p>           |
